I am writing to express my interest in the call for applications to the AERA Institute on Statistical Analysis for Education Policy: Causal Analysis Using International Data. My background as a former elementary/middle school educator and current doctoral studies in *Curriculum, Instruction, and the Science of Learning*, including research and study of statistical techniques tailored for educational analysis, would make me a fit for the institute. I am excited at the prospect to further develop my skills around educational data analysis and interact with knowledgeable experts in the field.
